

A Superpower I Wish I Have

By: Pratyush Kartikeya Sunkara

A super power I wish I have is Telekinesis because I can do almost anything, I can teleport, save people and even fly. If I can teleport I don't have to worry about going to soccer practice late because of traffic. I don't even need to worry about transportation like cars, buses and trains. I don't even need a drivers licence because I don't need a car or honestly anything to get somewhere I can just teleport. When I get older I don't even have to worry about getting late to my classes in middle school because I can just get to my other classes in one second by teleporting. If I don't buy a car, I can save that money and use it on other stuff like buying houses or even give the money to the poor so they can buy a house, get a car or even buy a meal. If I am in India and I want to go to America I don't need a flight, I can just fly or teleport with the power of my mind. If I can fly I can try playing Quidditch from the Harry Potter series. I can make a Quaffle out of wood, I can make a bludger out of clay and at last the snitch out of mettles golden balls and mettles wings that let the snitch fly. If there was a natural disaster I would be able to teleport people to safer places. Also if something happens to the traffic lights I can fix them or change the colors in the traffic lights with the power of my mind. If I

have telekinesis, I will be able to see through my friends thoughts and if I can do that I will never ever fight with my friends because I can fix what they think is wrong of me. I can help the blind people get from one place to another in one second by teleporting with the power of my mind using telekinesis. If there is a fire in a building I can help them get out of the building fast by teleporting and I can put out the fire by teleporting to a beach getting water and go back to the building and put out the fire using the water. If there is an Earthquake and it deals a lot of damage I can easily fix everything with the power of my mind using telekinesis. If I was in the 1700s I could have prevented the American Revolution by making an invisible barrier and Richard Henry Lee and the other people could make the Declaration of independence. With the power of my mind, I could have stopped Great Britain from being ruled by King George 111. I could stop any argument in the whole wide world, even people in the sea.
